org.springframework.boot:spring-boot-starter-test

org.springframework.kafka:spring-kafka

Dependency Management

Одна из частых проблем в разработке приложений - это несовместимость версий различных зависимостей.

Для ее решения каждый Spring Boot release разрабатывается и тестируется с определенным набором third-party зависимостей

`org.springframework.boot:spring-boot-dependencies`

How to build Spring Boot applications:

- Set Spring Boot version

- Add/create Spring Boot Starter

- Add properties (optional)

- Add/replace Spring Boot Starter Beans (optional)
